They may be, and obless are, average specimens of particular califies, and of special crops from which leguere selected, but no one need be deceived the hope of such a crop as the samples exhistel would indicate, if taken as fair samples the yield at large. The quality of the corn this year will be far superior to last year's crop. its is a point not to be disputed; but in quantithere is a large deficiency as compared with netage crops. Ohio will not yield in bushels, much if any, over five-eights of the quantity ured last year; Indiana one-half; Illinois the laws three-fourths. Kentucky and Tennes-* will furnish full crops.
